ANUP S UPADHYAY

MySQL Database Developer

I'm currently Mysql Developer at NSE Cogencis, Mumbai. I have total 11 years of experience(3 years as Database developer). I'm an end-to-end Database developer who loves developing & solving Database related issues. I'm always trying to grow and learn something new.

NSE Cogencis Information Services Ltd.

- Participating in database design and optimization efforts, including creating data models, developing schema, and setting up indexes.
- Writing efficient SQL queries, stored procedures, and triggers for data manipulation and retrieval.
- Troubleshooting and resolving database issues, including identifying and fixing bugs, optimizing queries, and improving database performance.

- Resolving all the applications related real time issues occurring on the NSE Cogencis Workstation terminal (Product by FIS) via accessing the live/production servers without letting any data outage to occur.
- Handling issues based on the NSE Cogencis Workstation terminal where we manage the data for all the Indian (NSE/BSE/commodity etc.) and international markets.
- Setting up the servers and configuring the applications over the servers.
- Testing, debugging the applications as per the application functionality and their testing scenarios on the test / staging servers and after successful testing, making the updates and the installations live on the production servers.

Orient Technologies Private Limited

- Creating and testing configuration files to be uploaded into the database.
- Participating in User Acceptance Test & providing the results to the Client.
- Resolving Application related issues through remote access and voice support.
- Testing the application as per requirement.
- Proficient in Trouble Shooting and De-bugging for the Database Application in SQL 2000/05.
- Taking database backup and restore if necessary.
- Creating and testing configuration files for Procter & Gamble Consumer Products and perform the UAT with the respective P&G brand man...
